Abstract: Today we are living in the age of the revolution of Information and communication Technology. The use of Information and Communication Technology is increasing day by day and has become very common among almost all the people of the world. As a part of the use of Information and Communication technology, majority part of the people of the world uses social media. In this paper investigator made a humble attempt to get a picture about the Display Pictures using patterns on the social media platform WhatsApp of the government primary teachers of the Navsari city. Total 118 primary teachers of total 14 Government primary school of the Navsari city were included in the population. Population itself was the sample. Data were collected by preparing one questionnaire in the form of Google form. Data were analyzed by calculating frequencies and per centages. The results of the study says that the teachers were not mad and crazy regarding the use of Display pictures.

Key Words: Display Pictures, WhatsApp, Navsari City

Background

Today we are living in the age of the revolution of Information and communication Technology. The use of Information and Communication Technology is increasing day by day and has become very common among almost all the people of the world. As a part of the use of Information and Communication technology, majority part of the people of the world uses social media. Rather the use of social media itself has become the synonyms of the use of Information and Communication Technology. The use of social media has touched to almost all walks of life. From the birth to the death all parts and stages of human life is influenced by the social media. As per the report of the Backlinko Team (2024) "As of July.2024 the number of people using social media is over 5.17 billion worldwide, with the average user accessing 6.7 social media platforms on a monthly basis." Moreover, this report says in addition that: "86.1% of the world's population is active on social media when looking at eligible audiences aged 18+ years." As we know there are various social media platforms are available viz. Facebook, WhatsApp, Instagram, LinkedIn etc. It is an interesting topic to find out that which social media platform is more popular among the various groups of the people particularly teachers. But in this paper investigator made a humble attempt to get a picture about the Display Pictures using patterns on the social media platform WhatsApp of the government primary teachers of the Navsari city.

Objectives of the study

Investigator concentrated on following two objectives:

- 1.To study the Display Pictures using pattern of the Government primary teachers of the Navsari City.
- 2.To offer necessary suggestions regarding the Display Pictures using pattern of the Government Primary teachers of the Navsari city.

Research Method

After thorough consideration about the title and objectives of the present study, investigator felt it proper to

apply survey method of research to conduct the on hand small but scientific research.

Population and Sample

To determine the population of the study and select proper sample from it, is the important step of research process. Investigator also followed thus step and decided proper population and sample of the present study. All the primary teachers of the Government primary schools of the Navsari city run by the Navsari Nagar Palika was the population of the present study. Accordingly total 118 teachers of total 14 schools were included in the population of the study. Investigator determined to collect the necessary data from all the such subjects. Thus, the population of the study was itself the sample of the study. No question raised before the investigator to apply any specific sampling method.

Research Tools

It is required for every investigator to apply proper research tools for the collection of required data. For the present study investigator prepared one questionnaire. In this questionnaire both closed and open-ended type questions were included. For the prompt and quick collection of the required data investigator converted this questionnaire in to the Google form. Thus, Investigator collected the required data using questionnaire in the form of Google form.

Data Collection procedure

As discussed in the earlier paragraph required data for the present study were collected in the form of Google form by circulating Google form to the primary teachers covered up under the present study. Here it is to be mentioned that out of total 118 teachers included in the sample 16 teachers did not fill up Google forms.

Statistical technique used

Looking to the objectives and nature of the collected data no need emerged regarding the use of any specific statistical technique. Investigator found excel sheets of the data received through Google form. Frequency distributions and per centages were used for the analysis and interpretation of the required data.

Major Findings

Following were the major findings of the present study:

- 1.Total 81.37% teachers were agreed that they used to keep display pictures on their WhatsApp.
- 2.All the teachers replied that they liked to use Display pictures on WhatsApp.
- 2.Only 7.84% teachers were Daily changing Display Pictures.
- 3.Majority (67.65%) of the teachers were not sure about when to change Display pictures.
- 4.Only 23 means 22.55% teachers said that they were changing their Display Pictures as per the occasions.
- 5.Total 45.10% teachers were of the opinion that they were posting their own photographs or their own photographs with their family members or friends as Display pictures.
- 6.Out of the study 27.45% teachers were posting religious pictures as Display pictures.
- 7.Natural scenes, different types of flowers are the choice of 18.63% teachers for the Display pictures.
- 8.Almost all (91.18%) teachers accepted that they used to observed the Display pictures of the other people using WhatsApp.
- 9.Out of the study 25.49% teachers accepted that they had never thought about the Display picture before.

Conclusions

Through the observation of the findings received after the analysis and interpretation of the data it can be said that the primary teachers of the Government primary schools of the Navsari city were found quite generous and responsible regarding the use of Display Pictures on the social media platform WhatsApp. It seems that teachers were not mad after the use of Display pictures on WhatsApp as they were not found changing their display pictures. Investigator would like to conclude with the only words that this study would prove useful to the people particularly to the users of various social media platforms in different ways. Moreover, It would help to the teachers of different stages to guide their students.
